DEFINITIONS

"*Convertible Bonds*", bonds that may be converted into or exchanged for a prescribed amount of common stock or other equity securities of the relevant issuer(s) within a particular period of time at a specified price or formula and includes all types of convertible bond that are eligible for investment by UCITS, including specifically the following:

- *Vanilla Convertible Bonds*: where the convertible bond is convertible into the equity of the issuer of the convertible bond at the option of the holder;
- *Exchangeable Convertible Bonds*: where the convertible bond is convertible into the equity of a company other than issuer at the option of the holder;
- *Convertible Bonds with detachable warrants*: where the warrant attached to the convertible bond can be detached and traded separately;
- *Mandatory Convertible Bonds*: where the convertible bond is automatically converted into equity at maturity;

but not including contingent convertible securities (i.e. CoCo bonds), being instruments issued by financial institutions that force the conversion into equity according to specific trigger events. The Fund will not invest in CoCo bonds.

"*Currency Manager*", State Street Bank and Trust Company and/or such other person as may be appointed, in accordance with Central Bank Requirements, to provide currency management services to the Fund.

"*Debt Securities*", include all types of UCITS-eligible bonds, convertible securities (including Convertible Bonds, warrants or convertible preferred stock), commercial paper, certificates of deposit, notes, short term debt obligations (i.e. debt obligations, such as treasuries or bonds that are due to mature within 1 year or within the then current fiscal year) and/or medium term debt obligations (i.e. debt obligations that are due to mature between 1 and 10 years of the date on which the debt was created).

"*Fund*", Lazard Global Convertibles Recovery Fund.

"*Hard Currencies*", means the Euro (EUR), the Swiss Franc (CHF), the Pound Sterling (GBP), the US Dollar (USD) and the Japanese Yen (JPY) currencies.

"*Hedged Share Classes*", those classes of Shares specified in Appendix I of this Supplement as being hedged Share classes.

"*Initial Offer Period*", the period during which Shares of a particular class or classes in the Fund are initially on offer as set out in this Supplement or such earlier or later period as the Directors, at their discretion, may determine and notify to the Central Bank.

"*Initial Offer Price*", the price per Share at which Shares of a particular class may be subscribed for during the relevant Initial Offer Period.

"*Investment Grade*", a rating of at least Baa3/BBB- by Moody's, Standard & Poor's or another recognised credit rating agency.

"*Investment Manager*", Lazard Asset Management LLC and/or such other person as may be appointed, in accordance with Central Bank Requirements, to provide investment management services to the Fund.

"*Non-Investment Grade*", a rating of Ba1/BB+ to B3/B- inclusive by Moody's, Standard & Poor's or another recognised credit rating agency.

"Share(s)", share(s) of the Fund.

"Unrated", having no rating assigned by a recognised rating agency, but deemed by the Investment Manager to be of an equivalent rating to a rating of B3/B- or higher by Moody's, Standard & Poor's or another recognised rating agency.

LAZARD GLOBAL CONVERTIBLES RECOVERY FUND

INTRODUCTION

The Company is authorised in Ireland by the Central Bank as a UCITS for the purposes of the Regulations. The Fund was approved by the Central Bank on 31 July 2020.

This Supplement forms part of the Prospectus and should be read in conjunction with the general description of the Company contained in the current Prospectus (together with the most recent annual and semi-annual reports).

The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different classes of shares with one or more classes representing a separate fund of the Company. Each fund may have more than one share class.

Details of the available classes of Shares in this Fund are set out in **Appendix I** to this Supplement.

As at the date of this Supplement, there are no other Share classes in the Fund, apart from those listed in Appendix I, but additional share classes may be added in the future in accordance with Central Bank Requirements.

The Fund Base Currency is the US Dollar. Share classes denominated in a currency different to the Fund Base Currency (with the exception of the Hedged Share Classes) will not be hedged against movements in the Fund Base Currency.

Dealing information, including a description of the procedures for subscribing and redeeming Shares, settlement deadlines, dealing frequency and pricing is set out in **Appendix II** to this Supplement.

The Fund promotes environmental and/or social characteristics and is therefore subject to the sustainability-related disclosure rules set out in Article 8 of the EU Sustainable Finance Disclosure Regulation (“**SFDR**”).

Information about the environmental and/or social characteristics of the Fund is set out in **Appendix III** to this Supplement.

An investment in the Fund should be viewed as medium to long term and should not constitute a substantial portion of an investment portfolio and may not be suitable for all investors.

Investment Objective and Policy

Investment Objective

The investment objective of the Fund is to maximise total return from income and capital growth.

Investment Policy

In pursuit of the Fund's investment objective, the Investment Manager pursues a globally-focused, actively-managed investment strategy designed primarily to identify and invest, as and when opportunities arise, in Convertible Bonds that the Investment Manager has determined are likely to experience recovery in valuations.

The strategy pursued by the Fund aims to identify opportunities to acquire Convertible Bonds which, according to the Investment Manager's analysis, have effectively been mispriced or undervalued by the market as a result of some manner of company specific, sectoral, regional or global disruption event (such as, for example, the COVID-19 market environment) but which, in the Investment Manager's opinion, are likely to experience some degree of recovery in their valuation/price, perhaps even to levels observed prior to the disruption event having occurred. The strategy specifically focuses on investment opportunities presented by companies, sectors or regions that have been underperforming or that are undervalued at the time of investment – for example, from a credit, equity

or implied volatility standpoint (i.e. where either the equity component or the credit/bond component of the convertible security is undervalued or where the implied volatility of the convertible is undervalued), but will also actively seek to invest in new Convertible Bond issuance that are eligible for investment by UCITS.

The Investment Manager, in pursuing this strategy, will aim to build and maintain a diversified portfolio comprised primarily of direct investments in any combination of fixed and/or floating rate Investment Grade and/or Non-Investment Grade and/or Unrated Convertible Bonds and/or other Debt Securities issued by companies or financial institutions or by governments, government agencies, quasi sovereign entities or supranational bodies from across the world.

Any rated security that is downgraded following acquisition by the Fund may continue to be held by the Fund until such time as the Investment Manager in its sole discretion determines to liquidate the position. The Fund shall at all times retain the flexibility to invest up to 100% of its Net Asset Value in securities that are rated below Investment Grade.

There are no restrictions on the average maturity of the Fund's portfolio or on the maturities of the individual debt instruments in which the Fund might invest.

The securities in which the Fund will invest will primarily be denominated in Hard Currencies, but may be denominated in any currency the Investment Manager deems appropriate for investment including, for example, the Hong Kong Dollar (HKD) and the Singapore Dollar (SGD).

The Fund's total Convertible Bond investment universe comprises approximately 1000 securities, which are screened to identify those Convertible Bonds that the Investment Manager is satisfied have an acceptable liquidity profile – typically that is where the total issue size is in excess of US\$100 million.

Potential investment candidates then undergo a two-step bottom-up analysis process involving:

- quantitative and qualitative analysis (including credit analysis) of the Convertible Bonds; and
- fundamental analysis of the equities underlying the Convertible Bonds.

Proprietary quantitative analysis is undertaken by the Investment Manager in order to assess each Convertible Bond's exposure levels or sensitivity to factors such as equity market performance, interest rates, credit spreads and implied volatility and to assess the Convertible Bond's premium in order to assist the Investment Manager in forming a view regarding the relative value of each Convertible Bond when assessed against: **(i)** comparable peers; **(ii)** historical value/price levels; **(iii)** the solvency situation of the issuer and/or **(iv)** what the Investment Manager assesses to be the future growth outlook or valuation prospects of the underlying equity. Qualitative analysis includes, amongst other matters, in-dept analysis, by the Investment Manager, of the legal specifications relating to the Convertible Bond as set out in its Prospectus.

The Investment Manager will also conduct credit analysis which will look at the credit quality of the individual issuers of the Convertible Bonds (i.e. the capacity of the issuer to meet its obligations), the potential for credit improvement, the duration of the bonds, issue currency etc. This analysis will involve an assessment of the relevant issuer's leverage ratios and cash flow generation, as well as of its net cash position and debt maturity schedule. The Investment Manager will also assess how this analysis for each company compares to companies within the same peer group.

The Investment Manager also conducts fundamental, bottom-up analysis of the equities underlying the Convertible Bonds in which the Fund might invest in order to form a view as to the growth outlook for the issuer and the potential for improving valuations in the underlying stock. This will include carrying out in depth business analysis of each relevant issuer company to assess factors such as the company's growth trajectory, operating margins and net income margins and how they compare to those of other companies within the same peer group.

The Fund incorporates environmental, social, and governance considerations as part of broader investment due diligence and ongoing monitoring of investments in the portfolio. The Fund also applies global norms-based and activity-based exclusion criteria in the issuer selection process.

Information in relation to the foregoing exclusion criteria and in relation to the sustainability-related features of the Fund's investments is set out in **Appendix III** to this Supplement, which Appendix details the environmental and/or social characteristics of the Fund.

In the last stages of the portfolio construction process, the Investment Manager's bottom-up analysis is overlaid with its top-down macroeconomic view of such factors as interest rates, yield curves, credit risk, sector spreads and currencies in order to create an optimal risk/return profile for the portfolio (being one where the expected return on the equity sensitivity and/or on the bond component of the convertible is accompanied by limited default risk according to the Investment Manager's analysis). A final review is then conducted in order to ensure sufficient diversification (for example, in terms of issuer or issue concentrations) and liquidity across the portfolio.

Country allocations and industry/sector exposures are residual consequences of the stock selection process rather than primary drivers of it and stock selection is not undertaken by reference to a benchmark.

The Fund does not intend to invest directly in equities, however, by holding a convertible security to maturity, for example, or by exercising an option on a warrant (see further below under the heading "*Investment in FDI*") or on a convertible security, or otherwise as a result of conversion, the Fund may from time to time hold equity securities on an ancillary basis up to a limit of 10% of the Net Asset Value of the Fund.

The Fund may also invest in units or shares of collective investment schemes including exchange traded funds and/or other sub-funds of the Company where such investment is consistent with the investment policy of the Fund. Aggregate investment by the Fund in open-ended collective investment schemes shall not exceed 10% of the Fund's Net Asset Value.

In seeking to achieve the Fund's investment objective, the Investment Manager may also make investments (including investments in derivative instruments as outlined below in the section entitled '*Investment in FDI*') designed to hedge various market risks that might impact the value of the Fund's portfolio such as risks relating to interest rates, currency exchange rates, credit, volatility and broad or security-specific changes in the prices of securities. FDI may otherwise be utilised within the portfolio as outlined in the '*Investment in FDI*' section below.

The Fund may also at times hold a portion of its Net Asset Value in cash which may be invested in accordance with the Investment Manager's cash management policy, as further detailed below in the section entitled "*Cash and Cash Management*".

Investment in securities listed or traded on the Regulated Markets of Russia shall not exceed 10% of the Fund's Net Asset Value at any time and shall be limited to securities that are listed or traded on the Moscow Exchange.

As a global strategy, the Investment Manager, in selecting securities for investment retains the flexibility to invest up to 100% of the Fund's Net Asset Value in emerging markets.

Investment in FDI

Subject to the Regulations and conditions imposed by the Central Bank, the Fund may also engage in transactions in FDI for hedging purposes (for example, to protect an asset against, or minimise liability from, fluctuations in market value or foreign currency exposures) for efficient portfolio management purposes (with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns within a level of risk consistent with the risk profile of the Fund) and/or for direct investment purposes (with a view to generating returns).

These FDI may be dealt in over-the-counter or be listed or traded on the Regulated Markets set out in Appendix I to the Prospectus.

Investments in FDI shall be in accordance with the relevant provisions of Appendix II of the Prospectus, including those relating to collateral requirements and eligible counterparties, in addition to other requirements contained in the Regulations and conditions imposed by the Central Bank.

Counterparties to the OTC FDI in which the Fund invests shall have no discretion over the composition or management of the Fund's portfolio or over the underlying of the relevant FDI. The approval of a counterparty is not required in relation to any portfolio transaction.

The underlying reference items of the FDI in which the Fund may invest will primarily relate to debt, equity, credit, interest rates and currencies and the FDI in which the Fund will invest will primarily be used to hedge against and/or expose the portfolio to equity, interest rate, foreign exchange, credit and/or volatility risk.

The FDI in which the Fund has the flexibility to invest are as follows:

Forwards (foreign exchange forwards, including non-deliverable currency forwards)

A forward contract locks in the price at which an index or asset may be purchased or sold on a future date. In forward foreign exchange contracts, the contract holders are obligated to buy or sell from another a specified amount of one currency at a specified price (exchange rate) with another currency on a specified future date. Forward contracts can be 'closed out' by entering into a reverse contract. The Fund may use foreign exchange forwards, including non-deliverable currency forwards, to protect against fluctuations in the relative value of its portfolio positions as a result of changes in currency exchange rates and/or to benefit directly from changes in currency exchange rates.

Swaps (credit-default swaps ("CDS") and foreign exchange swaps)

Generally, a swap is a contractual agreement between two counterparties in which the cash flows from two reference assets are exchanged as they are received for a predetermined time period. The Fund may invest in CDS in order to transfer the credit risk arising from the Fund's holding of debt securities, acquire a specific credit exposure or to speculate on changes in CDS spreads. Foreign exchange swaps may be used by the Fund to manage exchange rate/currency risk arising in the portfolio or to benefit directly from changes in currency exchange rates.

Credit-default swap indices

A credit-default swap index (for example, CDX or iTRAXX) is a credit derivative used to hedge credit risk or to take a position on a basket of credit entities. Unlike a CDS, which is an over-the-counter credit derivative, a credit default swap index is a standardised credit security and may therefore be more liquid and trade at a smaller bid-offer spread. This means that it can be cheaper to hedge a portfolio of CDS or bonds with a credit-default swap index than it would be to buy many single name CDS to achieve a similar effect. Credit-default swap indices may be used by the Fund to hedge credit risk arising in the portfolio or to take a position on a basket of credit entities.

Options (equity options, currency options, bond options, options on equity and bond indices)

An option is a contract which gives the contract buyer the right, but not the obligation, to exercise a term of the option, such as buying a specified quantity of a particular product, asset or financial instrument, on, or up to and including, a future date (the exercise date). The 'writer' (seller) has the obligation to honour the specified term of the contract. Since the option gives the buyer a right and the seller an obligation, the buyer pays the seller a premium. Put options are contracts that give the option buyer the right to sell to the seller of the option the underlying product or financial instrument at a specified price on, or before, the exercise date. Call options are contracts that give the option buyer the right to buy from the seller of the option the underlying product or financial instrument at a specified price on, or before, the exercise date. Options may also be cash settled. The Fund may buy or sell (write) exchange-traded or over-the-counter put and call options. The Fund may invest in options in order to gain exposure to certain asset classes, baskets of assets or markets in keeping with the investment policy of the Fund without having to invest directly in the reference assets or markets, or in order to protect against risks arising in the Fund's portfolio.

Futures (equity and bond futures, currency futures, bond/credit index futures, equity index futures, interest rate futures, futures on government securities

Futures are contracts to buy or sell a standard quantity of a specific asset (or, in some cases, receive or pay cash based on the performance of an underlying asset, instrument or index) at a pre-determined future date and at a price agreed through a transaction undertaken on an exchange. The Fund may invest in futures contracts in order to hedge against market risk, currency exchange risk or interest rate risk arising in its portfolio or to gain exposure to an underlying market or reference asset in keeping with the investment policy of the Fund without investing directly. Using futures to achieve a particular strategy instead of investing directly in the underlying security or index may result in lower transaction costs being incurred by the Fund.

Convertible Securities

The Fund may invest in convertible securities, which are Convertible Bonds or preferred stock which may be converted into or exchanged for a prescribed amount of common stock of the same or different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities ordinarily provide a stream of income, which generate higher yields than those of common stocks of the same or similar issuers but lower than the yield on non-convertible debt. The convertible securities in which the Fund may invest may embed a derivative element and may, as a result, generate leverage.

Warrants

Warrants are similar to options in that they give the holder the right but not the obligation to buy or sell stock at a set price in the future. A warrant guarantees the holder the right to buy (or sell) a specific number of shares at a specific price (the strike price) for a defined period of time. Unlike options on equity securities that are listed and trade on exchanges, warrants are usually issued by corporations through private transactions and typically trade over-the-counter. Not more than 15% of the Fund's Net Asset Value is proposed to be invested in warrants at any time.

Leverage

The Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, including through its investments in instruments which embed a derivative element, will be calculated on at least a daily basis using the commitment approach. Leverage in the portfolio shall at no time exceed 100% of the Fund's Net asset Value.

Cash and Cash Management

In addition to cash held by the Fund as ancillary liquidity for the settlement of transactions, the Fund may hold a portion of its Net Asset Value in cash due either to the Fund's use of FDI and/or because the Investment Manager otherwise deems it to be appropriate to do so. In such circumstances, the Investment Manager may seek to employ an effective cash management policy to seek to maximise the value of such cash holdings to the Fund, by investing in treasuries and a wide variety of other money market instruments and money market funds which satisfy Central Bank Requirements for investment by a UCITS and/or may seek to manage such cash using repurchase transactions (see further below).

Repurchase transactions will only be entered into on behalf of the Fund for efficient portfolio management purposes and will only be entered into subject to the conditions and limits set out in the Central Bank UCITS Regulations and in accordance with the provisions set out in Appendix II of the Prospectus.

SFTR

The Fund does not invest in "Total Return Swaps" as such term is defined in accordance with the SFTR.

The likely expected and the maximum proportion of Fund assets that may be subject to Securities Financing Transactions (specifically repurchase transactions) is as set out below (the market value expressed, in each case, as a percentage of the Fund's Net Asset Value):

| | Expected | Maximum |
|-------------------------|-----------------|----------------|
| Repurchase Transactions | 0-5% | 10 % |

General

The securities in which the Fund will invest shall, subject to the Regulations, be listed and/or traded on the Regulated Markets set out in Appendix I of the Prospectus.

Any investment in unlisted securities will be made in accordance with Central Bank Requirements.

All of the Fund's investments will be made on a long-only basis and in accordance with the restrictions set out in Appendix III of the Prospectus.

Currency Hedging Policy

The Fund may engage in currency hedging transactions, including investment in FDI, in order to provide protection against exposure to currency risk arising both at the level of its portfolio holdings and at Share class level. There can be no guarantee however that such currency hedging transactions will be successful or effective in achieving their objective.

The FDI which the Fund may use for currency hedging purposes are set out in the section of this Supplement entitled "Investment in FDI".

Hedging at Portfolio Level

The Fund may engage in currency hedging transactions in order to protect the value of specific portfolio positions or in anticipation of changes in the relative values of the currencies in which current or future Fund portfolio holdings are denominated or quoted. For example, the Fund may engage in currency hedging transactions in order to offset the currency exposure arising as a result of Investments in its portfolio being denominated in currencies different from the Fund Base Currency, or to protect against movements in currency exchange rates between the date on which the Investment Manager contracts to purchase or sell a security and the settlement date for the purchase or sale of that security, or to "lock in" the equivalent of a dividend or interest payment in another currency.

Hedging at Share Class Level

The Fund may also engage in currency hedging transactions in order to provide protection against movements of the currency in which a Share class is denominated relative either to the Fund's Base Currency or to the currencies in which the prorata portion of the assets of the Fund attributable to that Share class are denominated, where different. To the extent that such hedging transactions are successful, the performance of the relevant Hedged Share Class is likely to move in line with the performance of the Fund's Investments and Shareholders of the Hedged Share Class will not benefit as a result of a decline in the value of the currency in which the class is denominated relative to the Fund Base Currency or relative to the currencies in which the assets of the Fund are denominated. To the extent that the Fund employs strategies aimed at hedging certain Share classes, there can be no assurance that such strategies will be effective.

The Currency Manager has been appointed to provide non-discretionary currency hedging services in respect of the Hedged Share Classes of the Fund.

The costs and related liabilities/benefits arising from instruments entered into for the purposes of hedging currency exposure for the benefit of any particular Hedged Share Class of the Fund shall be attributable exclusively to the relevant Share class.

Currency exposure will not exceed 105% of the Net Asset Value of the relevant Hedged Share Class. All transactions will be clearly attributable to the relevant Hedged Share Class and currency exposures of different Share classes will not be combined or offset. The Company has procedures in place to monitor hedged positions and to ensure that over-hedged positions do not exceed 105% of the Net Asset Value of the relevant Hedged Share Class and that under-hedged positions do not fall short of 95% of that portion of the Net Asset Value of the relevant Hedged Share Class that is to be hedged against currency risk. As part of this procedure, the Company will review hedged positions in excess of 100% of the Net Asset Value of the relevant Hedged Share Class and any under-hedged positions on at least a monthly basis to ensure they are not carried forward from month to month. While not the intention of the Company, overhedged or underhedged positions may arise due to factors outside the control of the Company.

Investment and Borrowing Restrictions

The Company is a UCITS and accordingly the Fund is subject to the investment and borrowing restrictions set out in the Regulations and Central Bank Requirements. These restrictions are set out in detail in Appendix III to the Prospectus.

Risk Factors

Shareholders and potential investors should consider and take account of all of the risk factors set out in the Prospectus (in particular the risks under the headings "*Inflation Risk*", "*Credit Risk and Counterparty Risk*", "*Market Fluctuations*", "*Active Management Risk*", "*Liquidity Risk*", "*Risks Associated with Debt and Other Fixed Income Securities*", "*FDI Risk Factors*" and "*Emerging Markets Risk Factors*") in addition to those set out below.

Exchange Rate Risk

The Fund Base Currency is US Dollar. Share classes denominated in a currency different to the Fund Base Currency (with the exception of the Hedged Share Classes) will not be hedged against the Fund Base Currency and will, accordingly be subject to exchange rate risk in relation to the Fund Base Currency.

The Fund has the flexibility to invest in assets denominated in currencies different to the Fund Base Currency. Where the currencies in which portfolio assets are denominated differ from the Fund Base Currency and such exposures are not hedged the Fund may be affected unfavourably due to fluctuations in the relevant rates of exchange.

Convertible Securities Risk

Convertible securities include corporate bonds and preferred stocks of issuers that can be converted into (that is, exchanged for) common stocks or other equity securities at a stated price or rate. Convertible securities also include other securities, such as warrants, that provide an opportunity for equity participation. Because convertible securities can be converted into equity securities, their value will normally vary in some proportion with those of the underlying equity securities. Due to the conversion feature, convertible securities generally yield less than non-convertible fixed income securities of similar credit quality and maturity. The Fund's investment in convertible securities may at times include securities that have a mandatory conversion feature, pursuant to which the securities convert automatically into common stock at a specified date and conversion ratio. When conversion is not at the option of the holder, the Fund may be required to convert the security into the underlying common stock even at times when the value of the underlying common stock has declined substantially.

Sustainability

Sustainability Risks

The Investment Manager's Sustainable Investment and ESG (environmental, social and governance) Integration Policy (the "Policy") outlines its approach and commitment to incorporating environmental, social, and corporate governance considerations in investment processes to safeguard the interests of its clients and other relevant stakeholders, including the Fund. In particular, the Policy requires the

Investment Manager to integrate the consideration of Sustainability Risks in its management of the Fund's portfolio pursuant to the SFDR or similar local regulations.

The Investment Manager has access to ESG data from both internal and external resources, which allows it to assess the Sustainability Risks associated with prospective or existing investments for the Fund. This data includes:

- Internal information, including: proprietary research reports containing ESG impacts/attributes of companies, Materiality Mapping¹ analysis which evaluates ESG issues facing specific industry groups, an ESG Watchlist report that flags companies scoring poorly on a selection of ESG risk factors, and stewardship activity (engagement, proxy voting, shareholder resolution) information on ESG issues.
- Third-party data and information, including: ESG ratings and risk scores for systematic comparison of ESG performance across companies, controversies analysis and information, global norms compliance screens, and a wider set of ESG metrics for corporates and sovereign issuers in the investible universe.

When selecting investments for the Fund, the Investment Manager will employ some combination of the above-referenced data as well as other data to identify and assess the relevant Sustainability Risks. The Investment Manager's analysis of the Sustainability Risks and factors mitigating those Sustainability Risks may result in various outcomes, including without limitation an adjustment to its valuation of an issuer's securities, a decision to overweight or underweight exposure to those securities in the Fund's portfolio, or a decision to avoid investment in the securities. The Investment Manager's assessment of the Sustainability Risks relating to an investment for the Fund will evolve as it continues to conduct fundamental research concerning that issuer, its industry/sector, and other interested entities and stakeholders.

While the Investment Manager believes that Sustainability Risks likely may have negative impacts on the business activities and financial performance of certain issuers in the Fund's investment universe over time, the Investment Manager does not believe that those Sustainability Risks will have unique impacts on the future returns of the Fund. The Investment Manager currently believes that its investment process, when applied in normal market conditions to the universe of securities eligible for investment by the Fund, should help the Fund avoid investments that present unacceptably high Sustainability Risks and investments whose valuations do not accurately reflect such Sustainability Risks.

¹ The Investment Manager's proprietary Materiality Mapping analysis uses as its foundation the Sustainability Accounting Standards Board (SASB)'s Materiality Map™.

Profile of a Typical Investor

The Fund is suitable for investors with a medium to long term investment horizon seeking to achieve a return from an actively managed portfolio providing exposure primarily (although not exclusively) to convertible securities where their investment does not form a substantial portion of their portfolio and who are willing to tolerate a medium level of volatility.

Management and Administration

Detailed descriptions of the Directors and service providers to the Company are set out in the Prospectus.

FEES AND EXPENSES

Establishment Costs

All fees and expenses relating to the establishment of the Fund and the fees of the professional advisers to the Fund (establishment expenses) not exceeding US\$60,000 will be borne by the Fund.

To the extent that such fees and expenses are borne by the Fund, they will be amortised over the first 60 months of the lifetime of the Fund or such other period as the Directors may determine and will be charged as between the various classes thereof established by the Company within the amortisation period and in such manner as the Directors (with the consent of the Depositary) deem fair and equitable, provided that each class thereof will bear its own direct establishment costs and provided that such proportion of the establishment expenses as are to be amortised in each year are subject to the annual expense cap set out in the section entitled "*Other Expenses Cap*" below. If the effect of this accounting treatment becomes material in the future and there is a requirement to write off the unamortised balance of establishment and organisational costs, the Directors will reconsider this policy.

Share Class Fees and Charges

Details of certain fees and charges applicable to each class of Shares (including the Annual Management Fee and the maximum percentage fees payable on subscription, redemption and conversion) are set out in the tables included in Appendix I to this Supplement.

In addition to those fees and charges, each of the Hedged Share Classes shall bear its attributable portion of the fees payable to the Currency Manager. The Currency Manager has been engaged to facilitate the carrying out of foreign exchange transactions for the purpose of hedging the exposure of each Hedged Share Class to changes in the rate of exchange between the currency in which that Hedged Share Class is denominated and the Fund Base Currency. The fees payable to the Currency Manager are as set out in the Prospectus.

Expense Cap

Each class of Shares of the Fund shall also bear its attributable portion of the other expenses of the Company (as are set out in detail under the heading "*Other Expenses*" in the section of the Prospectus entitled "*Fees and Expenses*"). The payment of all such expenses out of Fund assets, with the exception of the expenses of acquiring and disposing of Investments (including custodial and sub-custodial transaction charges – which, if any, shall be at normal commercial rates - brokerage expenses, stamp duties and other relevant taxes), is subject to a cap of 0.30% per annum of the Net Asset Value of the Fund (the "**Expense Cap**"). The Manager will be responsible for discharging any relevant expenses as described above in excess of the Expense Cap. For the avoidance of doubt, the expenses of acquiring and disposing of Investments (including custodial and sub-custodial transaction charges (if any), brokerage expenses, stamp duties and other relevant taxes) are not subject to the Expense Cap and shall be borne in full out of the assets of the Fund.

Additionally, the Manager will not be responsible for the costs of hedging currency exposure for the benefit of any particular Hedged Share Class of the Fund, which costs shall be attributable exclusively to the relevant Hedged Share Class.

The Expense Cap is a cap on relevant expenses as described above and does not constitute a minimum expense charge to Fund assets – this means that in the event that the relevant expenses (as described above) actually incurred by the Fund in any particular financial year fall short of the amount represented by the Expense Cap, only the relevant expenses actually incurred by the Fund will be charged to the Fund's assets and not the full amount represented by the Expense Cap.

APPENDIX I

Share Class Details

| Distributing Share Classes | | | | | | | | | |
|--|---------------------------------|---|---|--|--|--|---|--|------------------------------|
| Dividends in respect of the Distributing Classes, where paid, will normally be paid in April and October of each year. Where requested by a Shareholder to be remitted in cash, dividends will be paid by telegraphic transfer to the bank account detailed in the Application Form or as subsequently notified to the Administrator by original written notification. Please also refer to the heading "Dividend Policy" in the Prospectus. | | | | | | | | | |

Accumulating Share Classes

Dividends will not be paid in respect of the Accumulating Classes.
Income and profits, if any, attributable to a particular Accumulating Class will be accumulated in the Fund on behalf of Shareholders of the relevant Accumulating Class and will be reflected in the Net Asset Value of that Accumulating Class.

| Class Currency (Note 1) | Type (Note 2) | Minimum Initial Subscription & Minimum Holding (Note 3) | Minimum Subsequent Subscription Amount (Note 3) | Minimum Redemption Amount (Note 3) | Annual Management Fee (Note 4) | Maximum Preliminary Fee (Note 5) | Maximum Redemption Fee (Note 6) | Maximum Switching Fee (Note 7) | Initial Offer Period & Price |

Notes:

- (1) Other than in exceptional circumstances, dealing and settlement will only take place in the currency in which the relevant Shares are denominated. Investors who wish to deal or settle in a currency different to the currency in which the relevant Shares are denominated should refer to the "Dealing/Settlement Currency" section of the 'Dealing Information' table in Appendix II.

Hedged Share Classes are denoted in this table by the inclusion of '(Hedged)' immediately following the relevant Share class currency. Please refer to the section of this Supplement entitled "Currency Hedging Policy" for further information in respect of Hedged Share Classes.

- (2) shareholders and investors are referred to the table below entitled "Share Class Types" for specific information (if any) pertaining to particular class types.
- (3) or the equivalent amount in the currency in which the relevant class of Shares is denominated (or less at the discretion of the Manager).
- (4) being a percentage per annum of the Net Asset Value attributable to the relevant class of Shares. The Annual Management Fee is accrued daily based on the daily Net Asset Value attributable to the relevant class of Shares and is paid to the Manager monthly in arrears. The Manager is also entitled to be reimbursed by the Fund for its reasonable out-of-pocket expenses. The Manager is responsible for discharging the fees and expenses of the Investment Manager, the Promoter and the Distributors out of the fees it receives from the Fund.
- (5) the Directors may, in their absolute discretion and in respect of each subscription for Shares, charge a preliminary fee of up to the amount specified, being a percentage of the Net Asset Value of the Shares subscribed. This preliminary fee shall be paid to the Manager. The Manager may pay all or any part of the preliminary fee to financial intermediaries assisting with the sale of Shares in the Fund.
- (6) the Directors may, in their absolute discretion and in respect of each redemption of Shares, charge a redemption fee of up to the amount specified, being a percentage of the Net Asset Value of the redeemed Shares.

A redemption fee will only be charged if the Directors believe that the redeeming Shareholder: (i) is engaged in short term trading in a manner which is considered by the Directors, in their absolute discretion, to be inappropriate and/or not in the best interests of the Fund's Shareholders or (ii) is attempting any form of arbitrage on the yield of the Shares.

- (7) the Directors may, in their absolute discretion, charge a switching fee of up to 1% of the Net Asset Value of the Shares to be switched.
- (8) the continuing Initial Offer Period for this Share class shall end at 5.00 pm (Irish time) on 19 December 2024 unless such period is shortened or extended by the Directors and notified to the Central Bank.

See the table below entitled "*Share Class Initial Offer Price*" for details of the price per Share at which Shares may be subscribed during the Initial Offer Period.

Applications for Shares during the Initial Offer Period must be received (together with cleared funds and all required anti-money laundering documentation) during the Initial Offer Period. All applicants for Shares during the Initial Offer Period must complete (or arrange to have completed under conditions approved by the Directors) the Application Form.

- (9) the Initial Offer Period for this Share class shall commence at 9.00 am (Irish time) on 20 June 2024 and shall end at 5.00 pm (Irish time) on 19 December 2024 unless such period is shortened or extended by the Directors and notified to the Central Bank.

See the table below entitled "*Share Class Initial Offer Price*" for details of the price per Share at which Shares may be subscribed during the Initial Offer Period.

Applications for Shares during the Initial Offer Period must be received (together with cleared funds and all required anti-money laundering documentation) during the Initial Offer Period. All applicants for Shares during the Initial Offer Period must complete (or arrange to have completed under conditions approved by the Directors) the Application Form.

| Share Class Initial Offer Price | |
|---|---------------------|
| Share Classes | Initial Offer Price |
| All CHF denominated classes | CHF100 |
| All EUR denominated classes | EUR100 |
| All GBP denominated classes | GBP100 |
| All HKD denominated classes | HKD1,000 |
| All JPY denominated classes | JPY10,000 |
| All USD denominated classes (with the exception of the USD denominated M class) | USD100 |
| USD denominated M class | USD1,000 |

| Share Class Types | |
|-------------------|--|
| C Classes | The Annual Management Fee charged in respect of Shares of the C Classes is a "clean fee" insofar as it does not include any provision to cover the payment of rebates to the holders of such Shares or the payment of retrocessions, commissions or other monetary benefits to third parties involved in the distribution of such Shares. |
| EA Classes | <p>The Annual Management Fee chargeable in respect of Shares of the EA Classes has been set at a rate intended to attract assets into the Fund. It is therefore intended that the EA Classes will only be available for investment, in accordance with the provisions set out below, for a limited period following publication of this Supplement.</p> <p>Subject as set out below, the EA Classes shall be closed to all further subscriptions on the expiration of one month following closure of the Initial Offer Period for the first of the EA Classes to attract investment or once the Net Asset Value of the Fund has reached US\$100 million (or such other amount as the Directors may at their discretion determine), whichever occurs first.</p> <p>Once the Directors have exercised their discretion to close the EA Classes to further subscriptions in accordance with the preceding paragraphs, a notice to that effect will be published on the Promoter's website at www.lazardassetmanagement.com.</p> <p>Shares of the EA Classes can be redeemed at any time in accordance with the normal redemption procedures set out in the section entitled "<i>Redemption Procedure</i>" in Appendix II of this Supplement.</p> |
| M Classes | <p>Shares in the M Classes are available for investment only to other funds managed or advised by a Lazard Affiliate or to such other persons as the Manager may determine from time to time (i.e. to Lazard personnel or to Lazard Affiliates for seeding or other purposes).</p> <p>For the purposes of this section:</p> |

| | |
|-------------------------|--|
| | <p>"<i>Lazard Affiliate</i>", means a company which has the ultimate parent of the Investment Manager as its ultimate parent, or a company in which that company has at least 50% direct or indirect ownership.</p> |
| <p>X Classes</p> | <p>Shares in the X Classes may only be acquired or held by an investor who is party to a current Investor Agreement (as such term is defined below).</p> <p>No transfer of Shares of the X Classes may be made unless the proposed transferee is party to a current Investor Agreement.</p> <p>No Annual Management Fees are charged to the assets attributable to the X Classes. Instead, Shareholders in an X Class will be subject to such management fees in respect of their investment in the relevant X Class as are set out in the Investor Agreement to which they are party, and for which they will be charged directly. In addition, and with respect to their investment in an X Class, relevant Shareholders will be subject to all other fees/charges applicable to an investment in an X Class as are specified in accordance with the terms of this Prospectus.</p> <p>The Company reserves the right, at the request of the Manager, to repurchase the entire holding of shares of any X Class Shareholder, if the Investor Agreement to which the relevant Shareholder is party is terminated for any reason whatsoever.</p> <p>For the purpose of this section:</p> <p>"<i>Investor Agreement</i>" means an agreement between a Lazard Affiliate and an investor in accordance with which the investor has agreed to invest in an X Class and to pay the fees associated with such investment as are specified in the agreement.</p> <p>"<i>Lazard Affiliate</i>", means a company which has the ultimate parent of the Investment Manager as its ultimate parent, or a company in which that company has at least 50% direct or indirect ownership.</p> |

APPENDIX II

| Dealing Information | |
|--|---|
| Business Day | a day normally treated as a business day in Dublin, London and New York. |
| Cut-Off Time | 12.00 noon (Irish time) on the relevant Dealing Day* * being the point in time on a Dealing Day up until which applications for subscriptions, switches, transfers and redemptions will be accepted. |
| Dealing Contact Details | <p>Address: Lazard Global Investment Funds plc Sub-Fund: Lazard Global Convertibles Recovery Fund Lazard Fund Managers (Ireland) Limited c/o State Street Fund Services (Ireland) Limited Transfer Agency Department 78 Sir John Rogersons Quay Dublin 2 D02 HD32 Ireland</p> <p>Tel: +353 1 242 5421 Fax: +353 1 523 3720 Email: LazardTA@statestreet.com</p> |
| Dealing Day | each Business Day. |
| Dealing/Settlement Currency | <p>Other than in exceptional circumstances, dealing and settlement will only take place in the currency of denomination of the relevant Share class.</p> <p>However, where payments in respect of the purchase or redemption of Shares are tendered or requested in a currency other than the currency of denomination of the relevant Share class, any necessary foreign exchange transactions will be arranged, subject to the agreement of the Manager, by the Administrator for the account of and at the risk and expense of the relevant investor on the basis of the exchange rate applicable as at the Dealing Day where available.</p> <p>Dividend payments will only be made in the currency of the denomination of the relevant Share class.</p> |
| Fund Base Currency | US Dollar (USD) |
| Settlement Deadline (for receipt of subscription monies) | <p>within three (3) Business Days of the Dealing Day in respect of which the subscription request was submitted.**</p> <p>** Subscription payments net of all bank charges must be made in the currency in which the order was placed and should be paid by telegraphic transfer to the bank account specified at the time of dealing.</p> |
| Settlement Deadline (for payment of redemption proceeds) | <p>within three (3) Business Days of the Dealing Day on which the redemption is effected***</p> <p>*** provided that all required documentation has been furnished to the Administrator and any matters requiring verification (e.g. account details) have been duly verified.</p> <p>In the case of a partial redemption of a Shareholder's holding, the Administrator will advise the Shareholder of the remaining Shares held.</p> <p>Redemption payments will be sent by telegraphic transfer to the bank account detailed on the Application Form or as subsequently notified to the Administrator in such format as may be requested by the Administrator.</p> |
| Share Price | <p>Shares can be bought and sold on any Dealing Day at the relevant Net Asset Value per Share.**</p> <p>** see section below entitled "<i>Dilution and Swing Pricing</i>" for information as to how the Net Asset Value per Share may be adjusted on any Dealing Day in calculating the Share Price in order to counteract the effects of dilution.</p> |

| | |
|--------------------------------|--|
| | Additionally, a preliminary fee may be charged on subscription and a redemption fee on redemption, but only in accordance with the terms specified in Appendix I of this Supplement. |
| Share Price Publication | the latest Net Asset Value per Share, expressed in the currency of denomination of the relevant Share class, will be available during normal business hours every Business Day at the offices of the Administrator and the Promoter and will be published on the Promoter's website at www.lazardassetmanagement.com (which must be kept up-to-date). |
| Valuation Point | 4.00 pm (New York time) on each Dealing Day. |

VALUATION OF ASSETS

The Net Asset Value of the Fund and of each Share class will be calculated by the Administrator as at each Valuation Point in accordance with the requirements of the Articles and full details are set out under the heading “*Statutory and General Information*” in the Prospectus.

SHARE PRICE

Shares are issued and redeemed at a single price, being the Net Asset Value per Share of the relevant class, which may be adjusted in the manner set out immediately below in the section entitled 'Dilution and Swing Pricing'.

DILUTION AND SWING PRICING

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares.

These dealing costs comprise Duties and Charges incurred in the purchase or sale of Investments and include the costs associated with spreads – i.e. the costs to a Fund associated with spreads between the estimated value attributed to Investments when calculating its Net Asset Value and the actual price at which such Investments are ultimately bought or sold by the Fund in the market place (“**Spreads**”). The incurring of such costs by the Fund can result in the Fund's value being diminished or 'diluted'.

With a view to mitigating the effects of dilution on the Fund, in certain circumstances, and at the Directors' discretion, the Company applies a dilution adjustment in the calculation of the Share Price for its Shares, a policy known as “swing pricing”.

Swing pricing, where applied to the Fund, aims to apply the burden of the costs associated with dealing in the Fund's Shares to the investors that actually request those Share deals on any particular Dealing Day, and not to the Shareholders in the Fund who are not trading in the Fund's Shares on the relevant Dealing Day. In this way, although it is not the aim of swing pricing to enhance results over time, it operates to mitigate the adverse effects of dilution as a result of those costs and to preserve and protect the value of shareholdings, thereby benefiting long-term Shareholders' net returns.

Swing pricing will operate in a manner that will aim to ensure that when, on any particular Dealing Day, the net dealing position exceeds a certain threshold, the Company will have the discretion to adjust the price for the Fund's Shares on that day so as to include a provision to account for the estimated associated costs. In this way, on any Dealing Day on which such an adjustment is applied, investors dealing in the Fund's Shares on that day, rather than the Fund itself (i.e. not the then existing or continuing Shareholders of the Fund), will bear the costs estimated to be incurred when buying or selling portfolio assets in order to satisfy or give effect to the dealing requests received.

Swing pricing, where applied, will involve pricing the Shares of the Fund as set out below:

- (i) where the Fund is in a net subscription position on any particular Dealing Day (i.e. where total purchases of the Fund's Shares exceeds total redemptions) and that net position exceeds a certain threshold determined by the Company at its discretion, the Net Asset Value per Share may be adjusted upwards by an appropriate percentage factor (not ordinarily exceeding 2% of the Net Asset Value per Share) to account for Duties and Charges (including the costs

associated with Spreads). Investors subscribing and/or redeeming Shares of a Class in the Fund on that particular Dealing Day will deal at this Share Price, being the Net Asset Value per Share of the relevant Class adjusted upwards; and

- (ii) where the Fund is in a net redemption position on a particular Dealing Day (i.e. where total redemptions of the Fund's Shares exceeds total subscriptions), and that net position exceeds a certain threshold determined by the Company at its discretion, the Net Asset Value per Share may be adjusted downwards by an appropriate percentage factor (not ordinarily exceeding 2% of the Net Asset Value per Share) to account for Duties and Charges (including the costs associated with Spreads). Investors subscribing and/or redeeming Shares of a Class in the Fund on that particular Dealing Day will deal at this Share Price, being the Net Asset Value per Share of the relevant Class adjusted downwards.

Accordingly, where applied for the purpose of calculating the Share Price on any particular Dealing Day, the swing pricing mechanism will involve the relevant Net Asset Value per Share being either increased to arrive at the Share Price (when the Fund is in a net subscription position) or decreased (when the Fund is in a net redemption position) by a percentage factor determined by the Company from time to time at its sole discretion (the "**Swing Adjustment**").

Since the Swing Adjustment for the Fund will be calculated by reference to the estimated or predicted costs of dealing in the underlying Investments of the Fund, including any dealing Spreads, and these can vary with market conditions, this means that the amount of the Swing Adjustment may vary over time. However, as indicated above, the Swing Adjustment, where applied to the Fund, shall not ordinarily exceed 2% of the Net Asset Value per Share. In exceptional circumstances, however, and only where deemed by the Directors to be necessary in order to protect Shareholders' interests in the Fund, the Swing Adjustment may exceed this threshold.

Where a Swing Adjustment is applied on any particular Dealing Day, it is applied to the Net Asset Value per Share. The Net Asset Value per Share of each Class of Shares of the Fund is calculated separately, but any Swing Adjustment will in percentage terms affect the Net Asset Value per Share of each Class of the Fund in an identical manner. Investors who subscribe into or redeem from the same Class of Shares on any particular Dealing Day will deal at a single price, being the Net Asset Value per Share of the relevant Class as adjusted, where relevant, by the Swing Adjustment. The Share Price for Shares of a particular Class on any Dealing Day will therefore always be the same regardless of whether an investor is subscribing into or redeeming from that Class. Where no Swing Adjustment is applied, investors will subscribe and redeem at the unadjusted Net Asset Value per Share for the relevant Class.

As indicated, the Swing Adjustment will be of a level that the Company considers appropriate to mitigate the dilutionary effects of the Duties and Charges which may be incurred by the Fund as a result of having to acquire or dispose of assets for the portfolio, as relevant, following subscriptions, redemptions and/or switches in and out of the Fund on the relevant Dealing Day. Importantly, the Swing Adjustment is designed to account for an approximation or estimate of the relevant dealing costs and may not reflect exactly (either underestimating or overestimating) the precise costs that are ultimately incurred. Any such overestimate will accrue to the benefit of the Fund, whereas any underestimate shall be borne by the Fund.

Additionally, a Swing Adjustment will typically only be applied if, on a given Dealing Day, the relevant net dealing position in the Fund exceeds a level (the "**Swing Threshold**") that has been pre-determined by the Company at its discretion. The Company, however, retains the discretion not to apply a Swing Adjustment, where this is considered to be in the best interests of Shareholders of the Fund as a whole. Where the Fund is experiencing net subscriptions or net redemptions of Shares and a Swing Adjustment is not applied, there may be an adverse dilutionary impact on the value of the Fund. The Company may also in the future remove the Swing Threshold for the Fund with the result that, when calculating the Share Price, the Net Asset Value of its Shares would be adjusted whenever there are net purchases or net redemptions of Shares.

The Company will not benefit from the operation of swing pricing and it will be imposed only in a manner, that, so far as is practicable, is fair to Shareholders and solely for the purposes of reducing dilution. At all times, a robust governance framework will be operated by the Company in relation to its application and use of swing pricing so as to ensure that both the Swing Threshold and the level of any Swing Adjustment are subject to appropriate review and revision as necessary taking into consideration the best interests of Shareholders.

SUBSCRIPTION PROCEDURE

All applicants subscribing for Shares must complete the application form prescribed by the Directors in relation to the Fund ("Application Form") and comply promptly with all necessary money laundering clearance requirements.

An Application Form accompanies this Supplement and sets out the methods by which and to whom the subscription monies should be sent. Application Forms shall (save as determined by the Manager) be irrevocable and may be sent by facsimile to the Administrator at the risk of the applicant.

The original Application Form should be sent to arrive with the Administrator within four Business Days of the date on which the application for Shares was made. All required anti-money laundering documentation (including such original documentation as may be required) should accompany the original Application Form.

Failure to provide the original Application Form and all required anti-money laundering documentation within the time period referred to in the previous paragraph may, at the discretion of the Manager, result in the compulsory redemption of the relevant Shares.

Applicants will be unable to redeem Shares on request until the original Application Form and all required anti-money laundering documentation has been received by the Administrator in a form satisfactory to it, and accepted.

Shareholders may subscribe for further Shares (i.e. post their initial subscription) by telephoning or sending a fax to the Administrator or by electronic means or by such other means as the Company may permit in accordance with Central Bank Requirements. Telephone dealing will be recorded by the Administrator.

All subscription requests received after the Initial Offer Period for the relevant Shares has closed will be dealt with on a forward pricing basis (i.e. by reference to the Net Asset Value of the Shares subscribed calculated as at the Valuation Point for the Dealing Day on which the subscription is effected).

Applications for Shares received after the Initial Offer Period for such Shares has closed must be received and accepted before the Cut-Off Time for the Dealing Day on which the subscription is to be effected. No application will be considered received and accepted by the Administrator until **(a)** a completed Application Form and **(b)** all required anti-money laundering documentation, have been received by the Administrator and both **(a)** and **(b)** satisfy the requirements of the Administrator.

Any such applications (as referred to in the previous paragraph) received after the Cut-Off Time for the relevant Dealing Day will normally be held over until the next following Dealing Day. However, in exceptional circumstances, applications received after the Cut-Off Time but prior to the Valuation Point for a particular Dealing Day may be accepted for dealing on that Dealing Day at the discretion of the Manager. Any request for subscription on a particular Dealing Day received after the Valuation Point for that Dealing Day will be held over until the next Dealing Day.

If payment in full in cleared funds in respect of a subscription has not been received by the Settlement Deadline specified in the "*Dealing Information*" table above, the Company may (and in the event of non-clearance of funds, shall) cancel the allotment and/or charge the applicant for any loss suffered by the Fund as a result of the delay or non-clearance. In addition, the Company will have the right to sell or redeem all or part of the applicant's holding of Shares in the Fund or in any other sub-fund of the Company in order to meet those charges.

REDEMPTION PROCEDURE

Every Shareholder will have the right to require the Company to redeem his Shares on any Dealing Day (save during any period when the calculation of the Net Asset Value is suspended in the circumstances set out under the heading “*Temporary Suspensions*” in the Prospectus) on furnishing to the Administrator a redemption request. Shares may be redeemed only by application through the Administrator.

All redemption requests are dealt with on a forward pricing basis (i.e. by reference to the Net Asset Value of the Shares to be redeemed calculated as at the Valuation Point for the Dealing Day on which the redemption is effected).

Redemption requests will only be accepted where cleared funds and completed documents are in place from original subscriptions. No redemption payment will be made until **(a)** the original Application Form and **(b)** all required anti-money laundering documentation (including such original documentation as may be required), have been received by the Administrator and both **(a)** and **(b)** satisfy the requirements of the Administrator.

Redemption requests must be received and accepted before the Cut-Off Time for the Dealing Day on which the redemption is to be effected. Shares will be redeemed at the relevant Share Price on the relevant Dealing Day (less such redemption fee, if any, as may be applied). If the redemption request is received after the relevant Cut-Off Time it shall normally be treated as a request for redemption on the Dealing Day following such receipt and Shares will be redeemed at the relevant Share Price for that day (less such redemption fee, if any, as may be applied). However, in exceptional circumstances, redemption requests received after the Cut-Off Time, but prior to the Valuation Point for the relevant Dealing Day may be accepted for dealing on that Dealing Day at the discretion of the Manager. Any request for redemption on a particular Dealing Day received after the Valuation Point for that Dealing Day will be held over until the next following Dealing Day.

Redemption requests shall (save as determined by the Manager) be irrevocable and may, at the risk of the relevant Shareholder, be given by telephone, fax, by post, by electronic means or by such other means as the Company may permit in accordance with Central Bank Requirements.

Compulsory Redemption

The Manager shall have the right to redeem compulsorily any Share or to require the transfer of any Share to a Qualified Holder if in its opinion **(i)** such Share is held by a person other than a Qualified Holder; or **(ii)** the redemption or transfer (as the case may be) would eliminate or reduce the exposure of the Company or the Shareholders to adverse tax or regulatory consequences.

Switching

Details in respect of switching are set out in detail under the heading “*Switching Between Share Classes and Funds*” in the Prospectus.

Transfers

The conditions relating to transfers of Shares are set out in the Prospectus.

APPENDIX III

Environmental and/or Social Characteristics

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

| | | | | | |
|--|---|--|---|---------------------------------|----------------------|
| <p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p> | <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 30%;">Product name:</td> <td style="width: 30%;">Lazard Global Convertibles Recovery Fund</td> <td style="width: 20%;">Legal entity identifier:</td> <td style="width: 20%;">254900BF3YG57YQDQU37</td> </tr> </table> | Product name: | Lazard Global Convertibles Recovery Fund | Legal entity identifier: | 254900BF3YG57YQDQU37 |
| Product name: | Lazard Global Convertibles Recovery Fund | Legal entity identifier: | 254900BF3YG57YQDQU37 | | |
| Environmental and/or social characteristics | | | | | |
| Does this financial product have a sustainable investment objective? | | | | | |
| <table style="width: 100%; border: none;"> <tr> <td style="width: 50%; text-align: center; border: none;">●● <input type="checkbox"/> Yes</td> <td style="width: 50%; text-align: center; border: none;">● <input checked="" type="checkbox"/> No</td> </tr> </table> | | ●● <input type="checkbox"/> Yes | ● <input checked="" type="checkbox"/> No | | |
| ●● <input type="checkbox"/> Yes | ● <input checked="" type="checkbox"/> No | | | | |
| <input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% | <input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments | | | | |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | | |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | |

| <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments | | | | | |
|  | What environmental and/or social characteristics are promoted by this financial product? | | | | |
| <p>The Fund's environmental and social characteristics are:</p> <ol style="list-style-type: none"> 1. To invest at least 10% of the Fund's NAV in companies which, in the opinion of the Investment Manager, qualify as sustainable investments. 2. To avoid investing in companies that violate global environmental and social norms. The Investment Manager assesses companies against an internally generated watchlist, which leverages third-party vendor information. An exclusion policy is applied by the Fund that prohibits investing in or obtaining exposure to companies that are deemed by the Investment Manager to violate United Nations Global Compact (UNGC) principles. This helps to avoid investments that, at a minimum, do not meet social and environmental norms with regards to human rights, labour, and anti-corruption, as well as environmental degradation. 3. To promote certain minimum environmental and social safeguards by applying specific exclusion thresholds on corporates that are involved in controversial weapons production, military weapons production, thermal coal mining or | | | | | |

| | |

| | production, or tobacco production. |
| <p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p> | <p>● What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?</p> <p>The Fund uses the following sustainability indicators to measure how the environmental and social characteristics of the Fund are attained:</p> <ol style="list-style-type: none"> 1. The Fund invests a minimum of 10% of NAV in investments which, in the opinion of the Investment Manager, qualify as sustainable investments. 2. The Fund has no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. 3. The Fund has no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production. |
| | <p>● What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?</p> |
| | <ol style="list-style-type: none"> 1. For environmentally sustainable investments, qualifying companies are assessed for their contribution to environmental objectives such as energy efficiency and resource efficiency activities such as renewable energy, water efficiency, green transportation, and digitisation, which support lower environmental impact from emissions and resource use. The Investment Manager identifies qualifying companies which contribute to environmental objectives by assessing: <ul style="list-style-type: none"> ● Positive contribution through products/services to environmental objectives. The Investment Manager undertakes a revenue-based assessment, using third-party company-level sustainability impact data, to determine the positive contribution of a company's products/services to environmental objectives. Companies which have, in the opinion of the Investment Manager, sufficient levels of revenue from products/services that have a positive sustainability impact can qualify as sustainable investments. ● Revenue alignment to environmental objectives set out under the Taxonomy Regulation ((EU) 2020/852) including climate change mitigation and adaptation. The Investment Manager uses third-party data on companies' Taxonomy-aligned revenue levels to determine a company's contribution to climate change mitigation and/or adaptation. Companies which have, in the opinion of the Investment Manager, sufficient levels of Taxonomy-aligned revenue can qualify as sustainable investments. ● Positive alignment and operational performance with respect to carbon reduction and net zero targets. The Investment Manager uses a proprietary climate assessment model, based on the Institutional Investors Group on Climate Change's (IIGC) Net Zero Investment Framework, to grade and assess companies carbon reduction and net zero ambitions. Companies' operations which are, in the opinion of the Investment Manager, sufficiently aligned with a net zero emissions objective can qualify as sustainable investments. 2. For socially sustainable investments, qualifying companies are assessed for their contribution to social objectives such as improved health care, sustainable food production and sourcing, improved safety and security services, access to financial services through inclusion, and improved education systems. The Investment Manager identifies qualifying companies which contribute to social objectives by undertaking a revenue-based assessment, using third-party company-level sustainability impact data, to determine the positive contribution of a company's products/services to social objectives. Companies which have, in the opinion of the Investment Manager, sufficient levels of |

| | |
|---|--|
| | <p>revenue from products/services that have a positive sustainability impact can qualify as sustainable investments.</p> <p>3. For socially/environmentally sustainable investments in fixed income securities, any investment in bonds the proceeds of which are used to pursue environmental, social and/or sustainability initiatives can qualify as sustainable investments. These bonds are often referred to as labelled bonds in the market. The environmental, social, or sustainable use of proceeds from a labelled bond is explicitly specified in the terms of the bond, and the issuer generally follows the voluntary green bond principles, social bond principles or sustainable bond guidelines set out in the Green Bonds Principles.</p> |
| <p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.</p> | <p>● <i>How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?</i></p> |
| | <p>The companies that qualify as sustainable investments are assessed as not significantly harming (DNSH) any environmental or social objectives through steps such as:</p> <ul style="list-style-type: none"> • screening out companies with material revenue exposure to controversial business activities, such as tobacco, gambling, weapons, electricity generation from fossil fuels. • post screen, undertaking an assessment of the relevant and available indicators of principal adverse impact (PAI) of the qualifying companies on sustainability factors to assess companies' interaction with key stakeholders such as employees, customers, communities, and the environment, as further detailed below. • an assessment of qualifying companies' compliance with global environmental and social norms through the UNGC process, as further detailed below. <p>Companies that do not pass the DNSH assessment do not qualify as a sustainable investment.</p> |
| | <p>— — <i>How have the indicators for adverse impacts on sustainability factors been taken into account?</i></p> |
| | <p>The Investment Manager's DNSH assessment takes into account the PAI indicators by reviewing the performance of qualifying companies against relative or absolute thresholds for the relevant mandatory PAI indicators (set out in Table 1, Annex I, EU Regulation 2022/1288 (SFDR Level 2)) for which data is sufficiently available. Relative thresholds for relevant PAI indicators (e.g. PAI 3, 4) are set by reference to peer performance against the PAI indicators in the sub-industry in which the qualifying company operates. Absolute thresholds are those embedded in the PAI indicator methodologies and criteria under SFDR Level 2 (e.g. PAI 10). The worst performing companies, either in relative or absolute terms, will not pass the DNSH assessment and will not qualify as sustainable investments.</p> |
| | <p>— — <i>How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</i></p> <p>Investment due diligence is carried out on investments' alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by leveraging third-party data on United Nations Global Compact (UNGC) principles. Post-investment monitoring ensures any sustainable investment flagged as being in violation of the UNGC principles by the relevant third-party vendor is assessed by</p> |

the Investment Manager’s Sustainable Investment and ESG team which will assign a pass/fail after a thorough assessment. An investment which fails this assessment will automatically not qualify as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, the Fund considers principal adverse impacts (PAIs) on sustainability factors.

Through pre-investment global norms and activity-based exclusions, the following PAIs are considered:

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- Exposure to controversial weapons (PAI 14, Table 1)

Through ESG integration and investment due diligence processes, the following PAIs are considered:

- Indicators related to GHG emissions and fossil fuel exposure (PAI 1-4, Table 1)
- Board gender diversity (PAI 13, Table 1)

Through post-investment stewardship activities, such as engagement or voting, the following PAIs are considered:

- Indicators related to GHG emissions and fossil fuel exposure (PAI 1-4, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- Board gender diversity (PAI 13, Table 1)

Material environmental and social issues such as those listed in the PAIs are regularly identified by investment professionals and are incorporated as part of the Investment Manager’s proprietary research processes. The Investment Manager also references third-party ESG research and data for additional information and relative industry positioning. Given limited availability of certain data points, the Investment Manager may use qualitative assessments while also adding further relevant data points in relation to the PAIs as corporate disclosure and data quality improve over time.

Information relating to PAIs will be made available in the Fund's annual financial reports.

No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance

Lazard Global Convertibles Recovery Fund is an actively managed convertible bond strategy that is benchmark-unaware and seeks to benefit from market anomalies in the global convertible bonds market. Issues are selected for the Fund using a fundamental investment process as described in the section of this Supplement entitled "Investment Policy" and in accordance with the strategy described below for selecting investments to attain the environmental and social characteristics of the Fund.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The Fund has the following binding elements:

1. For environmentally and socially sustainable investments, the Investment Manager assesses positive contribution to environmental and/or social objectives and DNSH compliance. Specific thresholds must be met to qualify as sustainable investments under the Investment Manager's framework as further detailed in the sections above: *What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?* and *How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?*
2. The Investment Manager assess violations of UNGC principles based on third-party data and internal research. Any company deemed to be breaching UNGC principles will be excluded from the Fund's investment universe and the Fund will have 0% exposure to such companies.
3. The Fund applies activity-based exclusion criteria for certain products and services and will have 0% exposure to securities excluded under this policy. The exclusion criteria for the Fund includes companies which are involved in:
4. the manufacture or production of controversial weapons (any revenue from anti-personnel mines, cluster munitions, nuclear weapons in countries not party to the Non-Proliferation Treaty (NPT), biological weapons, chemical weapons, depleted uranium weapons.).
 - military weapons production which represents 10% of revenue or greater.
 - tobacco production which represents 5% of revenue or greater.
 - thermal coal mining or production which represents 30% of revenue or greater.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

There is no committed minimum rate to reduce the scope of the investment considered.

● **What is the policy to assess good governance practices of the investee companies?**

The Investment Manager has developed Global Governance Principles that set out expectations for corporate governance on issues such as board independence, accountability and composition, as well as culture, remuneration, shareholder rights, amongst others. The principles provide a framework for governance assessments and stewardship activity, clearly setting out the Investment Manager's expectations of company management and effective stakeholder management.

The assessment of good governance practices is relevant only for corporate issuers in the Fund. The assessment is supported by a broad range of governance information from third-party ESG data sets. These data sources also provide governance-related controversy information, which can be used to flag governance issues at investee companies. Governance assessments and information are taken into consideration as part of due diligence processes, ongoing monitoring of issuers in the portfolio, and stewardship activities.

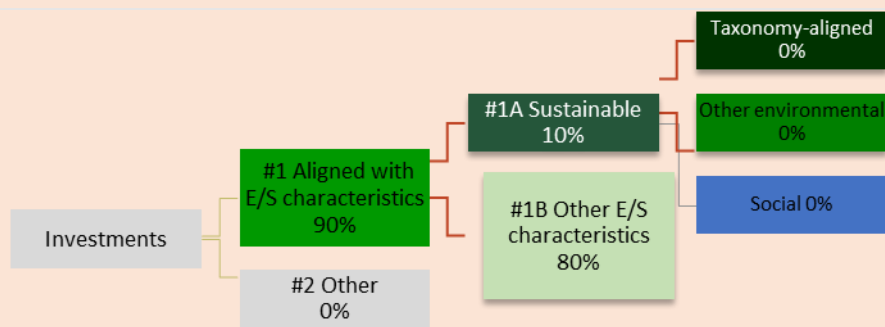

What is the asset allocation planned for this financial product?

At least 90% of the Fund's NAV will be in investments aligned with any one or more of the E/S characteristics of the Fund. The Fund invests a minimum of 10% of NAV in sustainable investments. Any investments in the "#2 Other" category will include investments and other instruments of the Fund that cannot be aligned with the environmental and/or social characteristics of the Fund. These can include, for example, derivatives, cash and cash/equivalents. The Fund does not make a minimum commitment to making investments that fall within the "#2 Other" category and therefore 0% is included for that category in the graphic below. This means that between 0% and 10% of the Fund's NAV might at any point in time be in investments that qualify as "#2 Other" investments. The planned asset allocation will be reviewed on an annual basis.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund does not use derivatives for attaining the environmental or social characteristics promoted by the Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Taxonomy-aligned investments. Therefore, the minimum share of Taxonomy-aligned environmentally sustainable investments is 0%. It is expected, however, that in pursuing its environmental characteristics, the Fund will contribute to one or more of the following environmental objectives as set out in the Taxonomy Regulation: climate change mitigation and/or climate change adaptation.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy²?**

- Yes:
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.
