The Fund estimates that it has distributed more than its net investment income and net realized capital gains. Therefore, some or all of the distribution paid to you may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income".

The amounts and sources of distributions reported in this Notice **are only estimates** and are not being provided for tax reporting purposes. The actual amounts and sources of the cumulative distributions for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. The Fund provides financial intermediary firms the information necessary to produce the Form 1099-DIV that you will receive, as well as how to report these distributions for federal income tax purposes.
